

Step 6: Test your site in all the resolutions The last step is to test your site in all the resolutions that are available on your computer. To do this you need to: 1. Right click on your Desktop and click on Properties Click on the tab Settings

page.

images accordingly (for your header). The easiest principle I follow (if possible) is to use the

top left and right corners for fixed images and let the middle tile according to the size of the

3. Under Desktop area click shift the scale to 800 x 600, 1024x768 or higher if possible

4. Once you have chosen the resolution you want to check the site in, click on the Test

5. If you can see the bitmap clearly you can click on Apply

Now building a website is as easy as 1-2-3!

BUY and download a <u>website template</u>. Choose from thousands of

Check your site in all the resolutions and if it is working fine you've successfully designed and developed a web site for all resolutions. Congratulations!

 CUSTOMIZE with your own images and text. Or use our template <u>customization services</u> – just \$499. UPLOAD your finished website to your hosting provider. We recommend Hostgator, host for Entheos. Please Like, Tweet, Share or Comment on this page if you found this tutorial/resource useful!

readymade designs!
