cells except for the content cell. You can leave this cell blank.

Check this out at 640 x 480, 800 x 600 and 1024 x 768 resolutions

Content

Simple Web Site Demonstration

HTML Code (Each cell is 9%) Step 5: Insert images and content

Once you have designed your tables in terms of percentages you need to insert your

top left corner and your navigation buttons in the top right or left navigation bar.

For more complex layouts you will need to use background fills to design your web sites.

Remember since you are designing web sites to fit all resolutions you need to position your images accordingly (for your header). The easiest principle I follow (if possible) is to use the

The last step is to test your site in all the resolutions that are available on your computer. To do

3. Under Desktop area click shift the scale to 800 x 600, 1024x768 or higher if possible

4. Once you have chosen the resolution you want to check the site in, click on the Test

images and content. The usual layouts will probably have a logo which can come on the

except for the content row which will scale to fit the page.

top left and right corners for fixed images and let the middle tile according to the size of the page. Step 6: Test your site in all the resolutions

1. Right click on your Desktop and click on Properties

this you need to:

Click on the tab Settings

5. If you can see the bitmap clearly you can click on Apply Check your site in all the resolutions and if it is working fine you've successfully designed and developed a web site for all resolutions. Congratulations!

Now building a website is as easy as 1-2-3!
