respectively

to fit the page.

Once you have designed your tables in terms of percentages you need to insert your

top left corner and your navigation buttons in the top right or left navigation bar.

For more complex layouts you will need to use background fills to design your web sites.

Remember since you are designing web sites to fit all resolutions you need to position your images accordingly (for your header). The easiest principle I follow (if possible) is to use the

top left and right corners for fixed images and let the middle tile according to the size of the

3. Under Desktop area click shift the scale to 800 x 600, 1024x768 or higher if possible

4. Once you have chosen the resolution you want to check the site in, click on the Test

Check your site in all the resolutions and if it is working fine you've successfully designed and
